

INGABIRE CHADIA

Information Systems Engineer | Backend Developer | Aspiring Data Engineer

✉ ingabirechadia2003@gmail.com | ☎ +250 799 342 158 | 📍 Nyarugenge, Kigali, Rwanda

PERSONAL INFORMATION

Names	Ingabire Chadia
Date of Birth	10 November 2003
Nationality	Rwandan
Home District	Kayonza District, Kabarondo Sector

PROFESSIONAL SUMMARY

Motivated and results-driven Information Systems student at the University of Rwanda with a strong foundation in backend development, data science, and software engineering. Proficient in multiple programming languages and frameworks, with hands-on experience building scalable server-side applications and a keen interest in data engineering and AI-powered systems. A proactive team player with excellent communication skills in English, Kinyarwanda, and French, committed to leveraging technology to solve real-world problems across Rwanda and beyond.

EDUCATION

BSc Information Systems — University of Rwanda 2023 – 2027

- Pursuing a four-year undergraduate degree with focus areas in software development, database systems, and network infrastructure.
- Relevant coursework: Data Structures & Algorithms, Database Management, Software Engineering, Networking Essentials, Systems Analysis & Design.
- Active participant in university tech clubs and collaborative student projects.

Rwanda Advanced Certificate of Education — Maryhill Girls' Secondary School 2020 – 2022

- Combination: MCE — Mathematics, Computer Science, Economics.
- Developed strong analytical and quantitative foundations that underpin current technical studies.

Rwanda Certificate of Primary Education / O-Level — Fawe Girls' School 2016 – 2018

- Completed the Ordinary Level national curriculum with distinction across core subjects.

TECHNICAL SKILLS

Programming Languages

Python	Java	JavaScript
C	C++	HTML / CSS

Frameworks & Libraries

Django	Flask	Spring Boot
REST APIs	SQL / NoSQL	

Data & AI

Data Analysis	AI Tools & Workflows	Pandas / NumPy
Data Visualisation	Machine Learning Concepts	

Infrastructure & Tools

Networking Essentials	Git & Version Control	Linux CLI
Postman	VS Code	

KEY COMPETENCIES

- Backend Development: Design and implement robust, scalable server-side applications using Python (Django/Flask) and Java (Spring Boot), with RESTful API integration.
- Data Engineering Foundations: Comfortable working with data pipelines, structured and unstructured datasets, and translating raw data into actionable insights.
- AI Integration: Skilled in leveraging AI tools and large language models to accelerate development workflows and build intelligent application features.
- Networking: Understanding of TCP/IP, network protocols, and essential infrastructure concepts applicable to distributed systems and cloud environments.
- Full-Stack Awareness: Front-end proficiency in HTML and CSS complements backend expertise, enabling effective collaboration across the full development stack.
- Problem Solving: Strong analytical thinking developed through mathematics and computer science coursework, applied to algorithmic and systems challenges.

SOFT SKILLS & PROFESSIONAL ATTRIBUTES

- Teamwork & Collaboration: Proven ability to work effectively in diverse, multidisciplinary teams with a cooperative and constructive approach.
- Communication: Fluent in English, Kinyarwanda, and French — able to communicate complex technical concepts clearly to both technical and non-technical audiences.
- Adaptability: Quick learner who thrives in dynamic environments and readily adopts new technologies and methodologies.
- Attention to Detail: Meticulous in code quality, documentation, and data accuracy — essential traits for a future data engineer.
- Initiative: Self-motivated and proactive in pursuing personal development, including independent study of data engineering and AI technologies beyond the formal curriculum.

CAREER OBJECTIVE

To grow into a skilled Data Engineer, building reliable data infrastructure and pipelines that empower organizations to make informed, data-driven decisions. In the near term, I aim to deepen my expertise in backend systems, cloud data platforms (such as Google BigQuery, AWS Glue, or Apache Spark), and ETL pipeline development. I am eager to contribute to Rwanda's digital transformation agenda and the broader African technology ecosystem through high-impact data engineering work.

LANGUAGES

Kinyarwanda	Native
English	Fluent — Professional proficiency
French	intermediate
